José Togbé

Lead UX / Product Designer

Houston, TX · (702) 788-7195 · josetogbe@gmail.com · josetogbe.com · linkedin.com/in/jose-togbe · English and French

SUMMARY

Lead UX designer with 10+ years making complex, high-stakes products clear and measurable across mortgage, banking, wealth management, insurance, and clinical healthcare tools. I reframe hard problems before designing them (login as a trust problem, a sales call as self-service) and anchor every project to a business metric. Most recently co-built an AI-native operating model at Freedom Mortgage that cut feature delivery from 8–12 weeks to 2–4.

SELECTED IMPACT

- **3–4x faster delivery, Freedom Mortgage:** cut feature-release cycles from 8–12 weeks to 2–4 by co-building an AI-native operating model.
- **$3M year-over-year revenue growth at 30% adoption, Hanger Clinic:** replaced phone and form-based device orders with a guided clinician configurator.
- **18% quote-completion lift, Allstate:** launched a self-service What-If tool for policy-change quotes.
- **20% fewer support calls, Schwab Charitable:** relaunched the Contributions experience and shortened the path to contribute.
- **37% lower mortgage-application abandonment, Navy Federal:** simplified the application and embedded education at decision points.
- **30% account-linking adoption at launch, Morgan Stanley × E*TRADE:** designed trust into each step of a post-acquisition integration.

EXPERIENCE

Freedom Mortgage · Senior UX Designer (contract) Jan 2025 – May 2026

Led the end-to-end redesign of the Freedom mobile app, the primary servicing experience for millions of homeowners.

- Co-architected an AI-native operating model that moved Product, UX, Engineering, and QA into daily shape, build, and validate sessions, cutting release time from 8–12 weeks to 2–4.
- Reframed registration and login as a trust problem rather than a form, building confidence before users entered sensitive credentials on the highest-drop-off journey.
- Designed pre-qualification as a conversation that asked only questions affecting the next decision; rewrote underwriting language that failed usability testing.
- Mentored 2 junior designers on research, design-system use, and AI-assisted workflows, and ran a weekly working session where the UX team reviewed in-progress work before it went to Product.

Allstate · Lead Product Designer / Information Architect (contract) Sep 2022 – Dec 2024

Led the redesign of My Account and Agent Service Center across Auto, Renters, and Homeowners.

- Launched the What-If quote tool so customers could preview premium changes before committing, turning a sales call into self-service and lifting digital completion 18%.
- Redesigned Auto Endorsement flows (add driver, add or replace vehicle, termination) by mapping where customers called for help and removing that confusion.
- Built prototype and developer-handoff templates that became the UX organization's default and shortened review cycles.

Charles Schwab · Senior UX/UI Designer / UX Architect (contract) Dec 2021 – Dec 2023

Modernized Schwab Charitable's Contributions and Granting experiences across web and native mobile.

- Shipped the revamped Contributions experience, cutting call-center inquiries 20% and shortening time to contribute.
- Defined the North Star granting journey that became the reference for downstream trade-offs.
- Restructured information architecture around how donors think about their giving, not how internal systems were organized.
- Mentored junior designers through critiques and design reviews, coaching them on presenting work to senior stakeholders.

Morgan Stanley · Lead UX/UI Designer / UX Architect Dec 2019 – Nov 2021

*Led design integration of E*TRADE into the Morgan Stanley ecosystem across web and mobile.*

- Drove 30% adoption of cross-platform account linking at launch by researching client concerns and designing trust into each step.
- Aligned E*TRADE and Morgan Stanley stakeholders on shared patterns by anchoring disputes in user evidence.
- Designed data visualizations for portfolio performance and cross-account positions.
- Led and mentored designers across both organizations, setting clear expectations and regular check-ins with business owners and engineers.

Navy Federal Credit Union · Senior UX/UI Designer Dec 2017 – Nov 2019

- Redesigned the mortgage application and embedded education (escrow, points, PMI) at decision points, reducing abandonment 37% and increasing education-page time 30%.
- Designed across credit card, home equity, mortgage, and auto-loan products on web, iOS, and Android.

Earlier · Citi, UX Designer (2017) · AT&T, UX Designer (2015–2016)

INDEPENDENT CONSULTING

UXMavericks · Principal UX Designer

Independent design consultancy delivering end-to-end UX for regulated insurance and healthcare clients.

- **Hanger Clinic (orthotics and prosthetics):** Led design of a guided configurator that replaced phone and JotForm device orders with one clinician flow. Contributed $3M in year-over-year revenue growth at 30% adoption.
- **MetLife (life insurance claims):** Led UX for the beneficiary claims experience, from the claim-kit landing page to e-signature, plus a phone path where reps capture the claim and send a secure link to finish online.

SELECTED PROJECTS

- **Pactara:** Fitness accountability app where groups commit to challenges and check in together. Live on the App Store with 50+ active users. Designed and built end to end in React, TypeScript, and Capacitor, including onboarding, social check-ins, the activity feed, and subscription pricing.
- **Ovalap:** Shows when friends are free and turns the time they share into a plan. Designed and built end to end in React Native for iOS, now in beta testing.

SKILLS

- **Design and research:** information architecture, user flows, prototyping, usability testing, heuristic evaluation, data visualization, responsive web and native iOS/Android, accessibility (WCAG)
- **AI-native workflow:** Cursor, design systems in GitHub, HTML/CSS/JavaScript, AI output evaluation
- **Tools:** Figma, Axure RP, UserTesting, Miro, Jira, Confluence
- **Leadership:** mentoring junior designers, executive presentations, workshop facilitation, cross-functional working sessions

EDUCATION

Babson College, B.S. Business Administration
Sorbonne (Paris IV), Certificate in History
